## ATTENTION:

1. The worn batteries and accumulators were solid wastes with danger. They are harmful to our health and environment. To avoid polluting with the leaking liquid, we should put the replacements into a special and leak-tight container. To avoid the hurt to people, it should be put away from the place people lived and worked with a warning sticker. The collected worn batteries and accumulators should be handed in to a competent institution according to the local statute.
2. The waste packages should be sorted and put into solid dustbins according to the materials and be collected disposal by local special environment protection bureau. To avoid pollution, it's forbidden to throw away the wastes random.
3. To avoid leaking during the use of the products, the user should prepare some absorbable materials (scraps of wooden or dry duster cloth) to absorb the leaking oil in time. To avoid second pollution to the environment, the used absorbable materials should be handed in to the special department in term of the local statute.
